Chapter One Review Questions:

1. List two Organizations mentioned in the chapter that provide computer forensics training.

-Law Enforcement Agencies
-Private or Corporations

2. Computer forensics and data recovery refer to the same activities. True or False?

I'm going to say True because that is the basic job that computer forensics professionals do, is data recovery.

3. Police in the United States must use procedures that adhere to?

The fourth amendment

4. The triad of computing security includes?

Vulnerability assessment, intrusion response, and investigation

5. List three common types of digital crime.

- child porn
- treason
- pirating software

6. A corporate investigator must follow fourth amendment standards when conducting an investigation. True or False?

I'm going to say True because it's the law we all have to follow the fourth amendment.

7. What is the purpose of maintaining a network of computer forensics specialists?

The purpose of a computer forensics specialist to maintain a network is to protect a network from intrusion. A computer forensics expert also knows how to intrude into a network, which can be a benefit to secure a network.

9. List two items that should appear on an internal warning banner.

-the right to monitor
-right to criminal prosecution

10. Warning banners are often easier to present in court than policy manuals are. True or False?

I'm going to say true because people will actually read a banner not a manual, and it gives them the right to say its short enough to read.

12. List two types of computer investigations typically conducted in the corporate environment.

- securing personal information
-retrieving information
